

Atari Translator, Version 2, Configured for the 1450XLD, Side B

The document itself begins on the next page.

Document source:

Original backup tapes owned by Dutchman2000, obtained by Atarimania.

Documentary research and PDF layout by Laurent Delsarte.

Note that these backup tapes contain A LOT of information spread out in many folders, meaning it will take time to process the important bits.

Document identification:

Original file name:	XLSIDEB.PRT
Title of document:	Atari Translator, Version 2, Configured for the 1450XLD, Side B
Author(s):	Joe MILLER (Joseph B. MILLER III) & Greg RIKER
Original file date:	1983-11-04
Type of document:	Software, commented source code
Target audience:	Internal
Status:	Ready
Reference (Atari):	(unknown)
Reference (Laurent Delsarte):	For any discussion, this PDF has been given the reference BKUP-1983-11-04-SOFT-0004A-2 which should be quoted in any communication.
Tags:	#Atari #8bit #6502 #400 #800 #1200XL #800XL #1400XL #1450XLD #OS #REV.A #REV.B #REV.10 #REV.11 #REV.1 #REV.2 #NTSC #Translator

Comments:

This is the printout of the original source code, fully commented.

What makes this document so interesting are all these valuable comments, as well as the specific features of this version (NTSC) compatible with the 1450XLD parallel disk drive.

Produced with ATARI CAMAC Assembler.

The ATARI Translator ----- D1:XLATOR.ASM
Program Identification and Revision History

```
0000      ; =====  
      ;  
      ; ATARI Translator  
      ;  
      ; Version 2 (Configured for the 1450XLD)  
      ; November 4, 1983  
      ;  
      ; This auto-booting diskette installs an ATARI 800 Operating  
      ; System (Revision B) in RAM "under" the ROM-based O.S. in  
      ; an XL-line computer. It exists to allow consumers to run  
      ; most 3rd party software which would otherwise fail to execute  
      ; on the XL computers due to "violations" of the rules  
      ; for proper Operating System usage. It is NOT meant to encourage  
      ; continued disregard for the stated O.S. guidelines  
      ; by independent software vendors.  
      ;  
      ; Once this disk has been loaded, the user is prompted to  
      ; remove it and insert the application diskette (or cassette)  
      ; and press the [SELECT] key. When this occurs the system  
      ; undertakes a COLD START in the new, RAM-based O.S. environment.  
      ; For all intents and purposes, the machine should then look  
      ; exactly like an ATARI 800 (with the few caveats outlined below)  
      ; and the program should boot and run fine.  
      ;  
      ; In order to properly service a [RESET]-triggered WARM START,  
      ; the RAM-based O.S. has been modified to continually "watch"  
      ; the contents of the DOSINI vector. When/if the application  
      ; sets this vector the O.S. saves the contents and steals it  
      ; back so that it always points to some code which re-enables  
      ; the soft O.S. upon [RESET]. A normal WARM START is then  
      ; processed by the soft O.S. This [RESET] key handling only  
      ; works for applications which do not themselves jump through  
      ; DOSINI. Side 'B' of the TRANSLATOR diskette has been configured  
      ; to allow programs of this class (ie. any which boot the  
      ; 850 Interface Module) to run properly. However, in this case  
      ; the [RESET] key will not reselect the RAM-based O.S.  
      ;  
      ; The Translator assumes the following conditions for proper  
      ; operation:  
      ;  
      ; + 64K RAM system (ie. 600XL w/expansion module)  
      ; + The application does not write to PORTB ($D301)  
      ; + IRQs and NMIs are not permanently disabled by the  
      ; application (or [RESET] may not function correctly)  
      ; + Application does not alter locations $0160 thru $0170  
      ; + Application does not expect RAM in 4K block at $C000  
      ;  
      ; By configuring the system as an ATARI 800, the application  
      ; will not be able to take advantage of certain XL-specific  
      ; features, such as function keys F1-F4, the HELP key, etc.  
      ;  
      ; MODS: Joe Miller Add parallel disk drive support 83-11-04  
      ; Joe Miller Add graphics and code for [RESET] 83-09-15  
      ; Greg Riker Original implementation 83-03-20

3F00

```

;-----
; This is an INCLUDEable file of the 800 Operating
; System, REV B. It should be noted that several patches
; have been made in order to accomodate the operation of
; this O.S. in the 'XL' computer line.
;
; The first patch is shown below:
;
; $E6D5  IHINIT  LDA    #$40
;                   STA    NMIEN
;                   LDA    #$38
;                   STA    PACTL
;                   STA    PBCTL
;                   LDA    #$00
;                   STA    PORTA
;                   STA    PORTB
;
; If this code were to execute, it would switch back
; to the XL OS. Therefore, the patch is as follows:
;
; $E6D5  IHINIT  LDA    #$40
;                   STA    NMIEN
;                   LDA    #$38
;                   STA    PACTL
;                   NOP ! NOP ! NOP
;                   LDA    #$00
;                   STA    PORTA
;                   NOP ! NOP ! NOP
;
; The other patch area occurs during Hardware Initialization:
;
; $F277  HARDI   LDA    #$00
;                   TAX
;                   CLRCHP STA    $D000,X
;                   STA    $D400,X
;                   STA    $D200,X
;                   STA    $D300,X
;                   INX
;                   BNE    CLRCHP
;                   RTS
;
; Once again, storing to PORTB or PBCTL will cause
; the XL OS to return. The patch is shown below.
;
; $F277  HARDI   LDA    #$00
;                   TAX
;                   CLRCHP STA    $D000,X
;                   STA    $D400,X
;                   STA    $D200,X
;                   NOP ! NOP ! NOP
;                   INX
;                   BNE    CLRCHP
;                   RTS
;-----

```
